About Us Atlantis Fly Fishing

Atlantis is a pioneering name in the realm of fly fishing, dedicated to providing enthusiasts with unparalleled experiences on the water. With a deep passion and intense expertise, we have earned the trust of fishermen all over the world. From the serene rivers of Scandinavia to the rugged streams of New Zealand, Atlantis is synonymous with quality, innovation, and adventure.

> What We Do

Our team has designed and developed a cutting-edge line of fly fishing equipment tailored to meet the needs of anglers at every level. With a focus on innovation and quality, we provide the tools for unforgettable moments on the water, catering to both seasoned anglers and beginners alike.

OUR MISSION

At Atlantis, our mission is to inspire and empower anglers worldwide by delivering exceptional fly fishing gear and experiences.

OUR VISION

Our vision at Atlantis is to redefine the boundaries of fly fishing, continuously pushing the envelope of innovation and exploration.

VALRUS

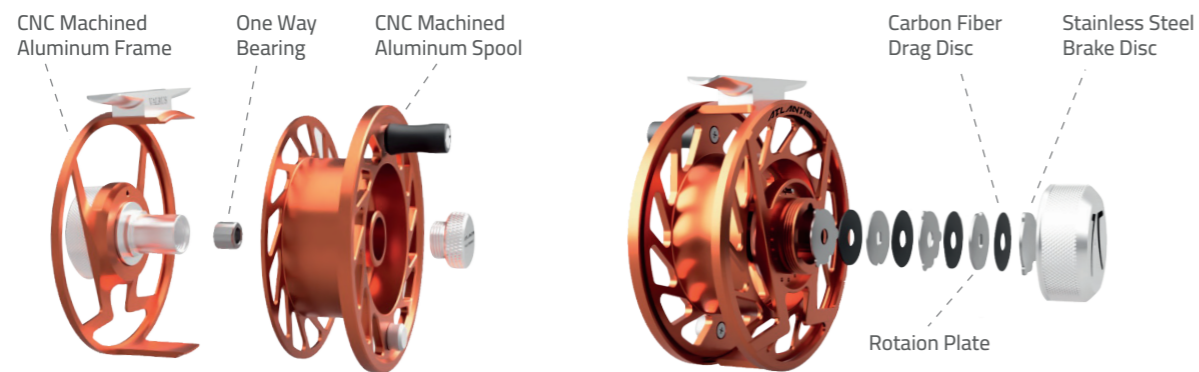

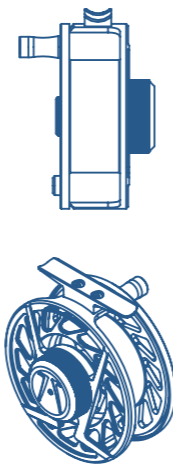

Embark on a new era of angling excellence with our debut fly fishing reel—a dynamic fusion of cutting-edge design and timeless thrill. Meticulously CNC machined from 6061 T6 aluminum, this reel isn't just a tool; it's a testament to our commitment to durability and optimal on-water performance.

The fully-sealed carbon drag system and large arbor combine for precise control and rapid line pick-up, ensuring you're always one step ahead. Designed for real-world conditions, the larger drag knob guarantees a comfortable grip in wet and cold environments. The openwork structure adds sophistication and efficiency, complemented by an easy and reliable spool release for seamless left to right-hand retrieval or a quick spool change.

We're not just creating reels; we're crafting experiences. Our passion for innovation shines through in every detail. Elevate your fly fishing journey with a reel that not only meets but exceeds the demands of the modern angler. Welcome to the future of fishing—welcome to Atlantis!

Product Features

- » CNC machined from 6061 T6 aluminium
- » Fully-sealed carbon drag system
- » Large arbor for fast line pick-up
- » Bigger drag knob, comfortable to use even with wet & cold fingers
- » Openwork structure
- » Easy and reliable spool release
- » Hard anodized (Type III) for surface protection and corrosion resistance
- » Simple conversion from left-hand retrieve to right-hand and vice versa
